Full stack developer with strong specialization in PHP Symfony, with experience in developing HR, logistics, invoicing and stock management applications. Currently active as a freelancer from Italy with a focus on scalable and high-performance technical solutions.

Work Experience

Freelancer, Honnetech Italy (Freelance), Italy
August 2024

- I am part of a freelancing team based in morocco. Developing multiple Symfony applications for companies, focusing on HR, logistics, and stock management solutions. We successfully delivered our first logistics and stock management application ahead of schedule and continue to work on new projects. As the group lead, I am responsible for defining key functionalities, selecting the best technical solutions, and contributing to both frontend and backend development.

Full-Stack Developer, Fondation Cheikh Zaid, Rabat - Morocco
June 2021 - August 2024

- **University Application Management,** covering:
  - ➤ Online student application and registration
  - ➤ Document submission and verification workflows
